01 PROFILE

Motivated software developer with strong experience in Android (Kotlin) and growing backend expertise in Nest Js and MySQL. Passionate about clean, maintainable code and modern development practices. Currently seeking a backend role where I can contribute, learn, and grow in a professional team environment

02 EDUCATION

Bachelor's Degree, University of Jijel — *Sep 2022 – Jun 2025*

Master's Degree (Expected), University of Jijel — *Sep 2025 – Jun 2027*

03 SKILLS

Android development-Kotlin	PHP Laravel
Node Js / Nest Js	Mongo DB
MySql DataBase	Git/Github

04 Projects

Olirab Fast Food Management Website (*Bachelor's Final Year Project, 2025*)

- Developed a complete management system for a fast food business, covering **orders, products, clients, and delivery tracking**.
- Implemented **role-based authentication** (admin, staff) and a dashboard for real-time business insights.
- Designed and built the **backend with Laravel**, ensuring clean architecture and scalable code.

- Integrated database management for inventory, sales, and reporting.
- **Technologies:** Laravel, PHP, MySQL, JavaScript.

Movie App (2023)

- Built a mobile app to browse and search movies with details such as ratings, cast, and trailers.
- followed **MVI architecture** with a modern UI in Jetpack Compose.
- **Technologies:** Kotlin, Jetpack Compose, Retrofit, MVVM.

05 PERSONAL HIGHLIGHTS

A social and collaborative individual who enjoys working with others and contributing to shared goals. Actively involved in the university's scientific club, participating in tech events, discussions, and peer learning activities. Able to communicate in English and French at a basic conversational level, with a strong willingness to improve. Strong interpersonal skills make it easy to adapt in team settings and contribute positively to any workplace culture.
